Redding Reloading Equipment Adds New 6.5 x 47 Lapua Die Sets

Cortland, NY..... Redding Reloading Equipment introduces new die sets in 6.5x47 Lapua for 2017. They will be available in Type-S, Type-S Match and Competition series Die sets for the most demanding handloading enthusiasts. Redding is known for both its commitment to quality and their innovation with popular cartridges.

Developed from scratch to be a pure long range competition chambering, it shares case head dimensions with the 308 but uses a small primer allowing for the use of higher pressures and added precision. It works in standard short actions and has been found to be extremely accurate. Good quality brass is available and numerous records have fallen as a result. All of these die sets will be available shortly after the SHOT Show in retail distribution, Redding Reloading Equipment will continue to support popular, new calibers as they are introduced or in this case as their popularity increases.

Redding had produced a number of dies for the cartridge on a custom basis for years but as popularity increased the company has chosen to add the full compliment of their precision die sets to their 2017 catalogued offerings.

Redding Reloading Equipment has focused on building the finest quality, American Made products for the precision handloading market since 1946.
