Redding Adds New Cartridges to its Master Hunter Die Set Offerings for 2019

Cortland, NY.....For 2019, Redding Reloading Equipment is offering their Master Hunter die set for two additional cartridges. New this year, are the 224 Valkyrie and the 6.5 PRC. These new Master Hunter die sets include a full-length sizing die coupled with the highly respected Redding Competition Seating Die. They will also be available in the new Master Hunter Deluxe Die Set, which includes a neck sizing die as well for use in on-range load development with less wear and tear on brass.

All hunters know that full-length sizing is critical when a high stress follow up shot is needed in the “real world” of hunting situations. While neck sizing is perfect for the range, hunting ethics demand that the hunter makes every effort to assure that his or her harvest is done with the greatest care for the animal. A stuck case or failure to properly feed can result in a long night of tracking or worse a wounded animal lost. The standard full length sizer also allows the use of all brands of cases which fit the SAAMI standard without the need to change bushings as would be required with the Type-S Match Full set.

New for 2019 The Master Hunter full length die contains a carbide expander, which puts less stress on the neck during expansion. Many experienced reloaders also believe this improves concentricity. Plus, a custom shoulder bump can be achieved by using this set with Redding’s unique Competition Shellholders.

The Redding Competition Seating Die is recognized as a superior straight line, seating die, which supports the case and controls the bullet for the best concentricity possible with the components used. The Competition Seating Die does not contain a crimp but today many premium, hunting bullets lack a “crimp groove” for a traditional roll crimp function.

Check with your dealer or consult the 2019 Redding catalog for a complete listing of calibers available in the Master Hunter Die Set series.
